VOLVO CONSTRUCTION EQUIPMENT
Building a sustainable culture – Building Tomorrow!

VOLVO ECR25 ELECTRIC

VOLVO L25 ELECTRIC
What is sustainability for us within Volvo CE?

- **Economic sustainability**
  To offer competitive and financially healthy products and services, enabling investments for the future.

- **Environmental sustainability**
  To limit emissions and use of natural resources in all phases of the product lifecycle.

- **Social sustainability**
  To care for people’s health and wellbeing in all parts of the value chain and to contribute to a sustainable development of the society.

**To live our Purpose:** To adopt a sustainable mindset across the value chain to deliver clean, productive and innovative products and services to customers – and a better world to society.
The Volvo Group commits to the Science Based Targets initiative

Press release
AB Volvo
11/05/20

The Volvo Group is taking the next step in adjusting and future-proofing the company in line with the ambitions of the Paris Climate Agreement. The ambition is that Volvo Group will be a net-zero emissions company by 2050, at the very latest. In order to be transparent on its progress, the company is now committing to the Science Based Targets initiative.

Sustainable Development Goals

Volvo CE, Nobel Talks
5/12/21
The Supplier Code of Conduct is the base towards our suppliers and business partners outlining both requirements and aspirations of sustainable business conduct covering five areas:

1. Human Rights & Working Conditions
2. Health and Safety
3. Responsible Sourcing of Raw Materials
4. Environmental Performance
5. Business Ethics
